Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery (Chromatographic Science Series)

Paul C.H. Li

Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery (Chromatographic Science Series) Paul C.H. Li

The microfluidic lab-on-a-chip allows scientists to conduct chemical and biochemical analysis in a miniaturized format so small that properties and effects are successfully enhanced, and processes seamlessly integrated. This microscale advantage translates into greater sensitivity, more accurate results, and better information.

Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery focuses on all aspects of the microfluidic lab-on-a-chip technologies and offers an overview of the available technology, its limitations, and its breakthroughs over the years. It emphasizes analytical applications of microfluidic technology and offers in-depth coverage of micromachining methods, microfluidic operations, chemical separations, sample preparation and injection methods, detection technology, and various chemical and biological analyses. Other topics of interest include the use of polymeric chips, fluid flow valve and control, single-cell analysis, DNA and RNA amplification techniques, DNA hybridization, immunoassays and enzymatic assays.

Originally conceived as a single chapter published in Ewing's Analytical Instrumentation, this book is a gateway to the vast literature and conference proceedings on the topic. Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery expands upon its roots to present a comprehensive treatment of microfluidic lab-on-a-chip methods and applications for novices and advanced researchers alike.

From reader reviews:

Douglas Leverette:

Information is provisions for folks to get better life, information today can get by anyone from everywhere. The information can be a understanding or any news even a problem. What people must be consider any time those information which is in the former life are challenging to be find than now is taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you get the unstable resource then you understand it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery (Chromatographic Science Series) as the daily resource information.

Shantel McCary:

This book untitled Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery (Chromatographic Science Series) to be one of several books this best seller in this year, that is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this particular book in the book retail outlet or you can order it by using online. The publisher with this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Smart phone. So there is no reason to your account to past this guide from your list.

Sharon Brogdon:

A lot of people always spent their free time to vacation or maybe go to the outside with them family members or their friend. Did you know? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you want to try to find a new activity this is look different you can read some sort of book. It is really fun to suit your needs. If you enjoy the book that you read you can spent the entire day to reading a book. The book Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery (Chromatographic Science Series) it is very good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. When you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore easily to read this book through your smart phone. The price is not too costly but this book has high quality.

Jerold Niemi:

The book untitled Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery (Chromatographic Science Series) contain a lot of information on the idea. The writer explains the woman idea with easy approach. The language is very straightforward all the people, so do not really worry, you can easy to read this. The book was written by famous author. The author will take you in the new time of literary works. You can read this book because you can read on your smart phone, or model, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and also order it. Have a nice learn.
