Carraher's Polymer Chemistry, Ninth Edition

Charles E. Carraher Jr.

Carraher's Polymer Chemistry, Ninth Edition Charles E. Carraher Jr.

Most of the advancements in communication, computers, medicine, and air and water purity are linked to macromolecules and a fundamental understanding of the principles that govern their behavior. These fundamentals are explored in **Carraher's Polymer Chemistry, Ninth Edition**. Continuing the tradition of previous volumes, the latest edition provides a well-rounded presentation of the principles and applications of polymers. With an emphasis on the environment and green chemistry and materials, this edition offers detailed coverage of natural and synthetic giant molecules, inorganic and organic polymers, biomacromolecules, elastomers, adhesives, coatings, fibers, plastics, blends, caulks, composites, and ceramics.

Using simple fundamentals, this book demonstrates how the basic principles of one polymer group can be applied to all of the other groups. It covers reactivities, synthesis and polymerization reactions, techniques for characterization and analysis, energy absorption and thermal conductivity, physical and optical properties, and practical applications. This edition includes updated techniques, new sections on a number of copolymers, expanded emphasis on nanotechnology and nanomaterials, and increased coverage of topics including carbon nanotubes, tapes and glues, photochemistry, and more.

With topics presented so students can understand polymer science even if certain parts of the text are skipped, this book is suitable as an undergraduate as well as an introductory graduate-level text. The author begins most chapters with theory followed by application, and generally addresses the most critical topics first. He provides all of the elements of an introductory text, covering synthesis, properties, applications, and characterization. This user-friendly book also contains definitions, learning objectives, questions, and additional reading in each chapter.

From reader reviews:

Mae Marks:

Within other case, little folks like to read book Carraher's Polymer Chemistry, Ninth Edition. You can choose the best book if you appreciate reading a book. So long as we know about how is important a book Carraher's Polymer Chemistry, Ninth Edition. You can add knowledge and of course you can around the world by the book. Absolutely right, simply because from book you can know everything! From your country till foreign or abroad you will be known. About simple factor until wonderful thing you can know that. In this era, we can open a book or maybe searching by internet gadget. It is called e-book. You may use it when you feel bored to go to the library. Let's read.

Paulette Preston:

Typically the book Carraher's Polymer Chemistry, Ninth Edition has a lot of knowledge on it. So when you make sure to read this book you can get a lot of benefit. The book was authored by the very famous author. Tom makes some research before write this book. This particular book very easy to read you may get the point easily after perusing this book.

James Bouchard:

Do you have something that you enjoy such as book? The book lovers usually prefer to pick book like comic, limited story and the biggest the first is novel. Now, why not seeking Carraher's Polymer Chemistry, Ninth Edition that give your satisfaction preference will be satisfied by means of reading this book. Reading routine all over the world can be said as the method for people to know world better then how they react when it comes to the world. It can't be claimed constantly that reading habit only for the geeky man or woman but for all of you who wants to end up being success person. So , for every you who want to start looking at as your good habit, it is possible to pick Carraher's Polymer Chemistry, Ninth Edition become your own personal starter.

Mary Scruggs:

That e-book can make you to feel relax. This kind of book Carraher's Polymer Chemistry, Ninth Edition was colorful and of course has pictures on there. As we know that book Carraher's Polymer Chemistry, Ninth Edition has many kinds or style. Start from kids until teens. For example Naruto or Investigator Conan you can read and feel that you are the character on there. Therefore not at all of book usually are make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading that.
