At its founding, Boston was a small peninsula; over the last 375 years the city has doubled in size by filling in the surrounding tidal flats--areas covered with water at high tide and exposed at low. In *Walking Tours of Boston's Made Land*, historian Nancy Seasholes outlines twelve walks that trace where and why Boston's man-made land was created, and, along the way, uncovers fascinating and little-known pieces of Boston history. In the course of these walks--around the central waterfront, Back Bay, Beacon Hill, the South End, Charlestown, and elsewhere--she shows us how Boston's past is always just below the surface of its present. Each walk is accompanied by a map that shows the route and original shoreline. The walks are illustrated with historical maps, historical photographs and views, and current photographs. All walks are accessible by public transportation.
