Daniel W. McShea, Robert N. Brandon

## **Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems**

Daniel W. McShea, Robert N. Brandon

Life on earth is characterized by three striking phenomena that demand explanation: adaptation—the marvelous fit between organism and environment; diversity—the great variety of organisms; and complexity—the enormous intricacy of their internal structure. Natural selection explains adaptation. But what explains diversity and complexity? Daniel W. McShea and Robert N. Brandon argue that there exists in evolution a spontaneous tendency toward increased diversity and complexity, one that acts whether natural selection is present or not. They call this tendency a biological law—the Zero-Force Evolutionary Law, or ZFEL. This law unifies the principles and data of biology under a single framework and invites a reconceptualization of the field of the same sort that Newton's First Law brought to physics.

*Biology's First Law* shows how the ZFEL can be applied to the study of diversity and complexity and examines its wider implications for biology. Intended for evolutionary biologists, paleontologists, and other scientists studying complex systems, and written in a concise and engaging format that speaks to students and interdisciplinary practitioners alike, this book will also find an appreciative audience in the philosophy of science.

### **From reader reviews:**

#### **Corey Valenzuela:**

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a move, shopping, or went to typically the Mall. How about open or perhaps read a book eligible Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems? Maybe it is to get best activity for you. You realize beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have other opinion?

#### **Lynda Wright:**

The book Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems can give more knowledge and information about everything you want. So just why must we leave a very important thing like a book Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems? Wide variety you have a different opinion about book. But one aim in which book can give many info for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or facts that you take for that, you can give for each other; you can share all of these. Book Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems has simple shape but you know: it has great and big function for you. You can appearance the enormous world by open up and read a book. So it is very wonderful.

#### **Billie Luster:**

This Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems book is simply not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is definitely information inside this book incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This specific Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems without we realize teach the one who studying it become critical in contemplating and analyzing. Don't become worry Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems can bring any time you are and not make your case space or bookshelves' grow to be full because you can have it in your lovely laptop even mobile phone. This Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems having great arrangement in word and layout, so you will not really feel uninterested in reading.

#### **Janice Garcia:**

As people who live in the actual modest era should be revise about what going on or facts even knowledge to make these individuals keep up with the era which is always change and move forward. Some of you maybe will probably update themselves by reading books. It is a good choice to suit your needs but the problems

coming to anyone is you don't know which one you should start with. This *Biology's First Law: The Tendency for Diversity and Complexity to Increase in Evolutionary Systems* is our recommendation to help you keep up with the world. Why, as this book serves what you want and wish in this era.
