Facing the Cognitive Challenges of Multiple Sclerosis

Jeffrey Gingold

Facing the Cognitive Challenges of Multiple Sclerosis Jeffrey Gingold

When attorney Jeffrey N. Gingold misplaced his wife on the living room couch, and became lost while driving just blocks from his home, little did he know that he was experiencing a hidden symptom of multiple sclerosis: cognitive difficulties. *Facing the Cognitive Challenges of Multiple Sclerosis* is a courageous and compelling personal account of one man's anguishing struggle with this aspect of the disease. It was written for the silent majority of MS patients who are privately dealing with MS cognitive symptoms and potential disabilities. The National Multiple Sclerosis Society estimates that over 400,000 people in the U.S. have been diagnosed with multiple sclerosis, and there are millions more worldwide. Conservatively speaking, half of them will encounter varying degrees of cognitive difficulties. *Facing the Cognitive Challenges of Multiple Sclerosis* brings this hidden disability into the open. It is an essential resource that will educate individuals coping with multiple sclerosis, and inform their families, caregivers, doctors and therapists.
