Methods in Bioengineering: Systems Analysis of Biological Networks (The Artech House Methods in Bioengineering) Arul Jayaraman, Juergen, Editors Hahn

This cutting-edge volume provides a detailed look at the two main aspects of systems biology: the design of sophisticated experimental methods and the development of complex models to analyze the data. Focusing on methods that are being used to solve current problems in biomedical science and engineering, this comprehensive, richly illustrated resource shows you how to: Design of state-of-the art methods for analyzing biological systems, implement experimental approaches for investigating cellular behavior in health and disease, use algorithms and modeling techniques for quantitatively describing biomedical problems, and integrate experimental and computational approaches for a more complete view of biological systems.
