Statistical Power Analysis for the Behavioral Sciences, Revised Edition emphasizes the importance of statistical power analysis.

This edition discusses the concepts and types of power analysis, t test for means, significance of a product moment  $r_s$ , and differences between correlation coefficients. The test that a proportion is .50 and sign test, differences between proportions, and chi-square tests for goodness of fit and contingency tables are also elaborated. This text likewise covers the F tests of variance proportions in multiple regression/correlation analysis and computational procedures.

This publication is intended for behavioral and biosocial scientists who use statistical inference, but also serves as a supplementary textbook for intermediate level courses in applied statistics in behavioral/biosocial science.
