Vasile Palade, Cosmin Danut Bocaniala

Computational Intelligence in Fault Diagnosis (Advanced Information and Knowledge Processing)
Vasile Palade, Cosmin Danut Bocaniala
Presenting the latest developments and research results on fault diagnosis approaches using computational intelligence methodologies, this book opens with a review of the state-of-the-art before focusing on various theoretical aspects of computational intelligence methodologies applied to real-world fault diagnosis problems. Chapters deal with topics such as fuzzy sets applications to fault diagnosis, neural network based fault diagnosis applications and neuro-fuzzy techniques for fault diagnosis. The last chapter considers the problem of diagnosing large scale complex systems using local agents which, can be implemented using computational intelligence based fault diagnosis techniques. Several case studies are used. This book presents the most recent concerns and research results in industrial fault diagnosis using intelligent techniques, and will be of interest to application engineers/technologists, graduates and researchers wishing to apply these techniques, as well as build up a foundation for further study.

From reader reviews:

Vincent Overly:

In this 21st one hundred year, people become competitive in most way. By being competitive currently, people have do something to make them survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yeah, by reading a publication your ability to survive enhance then having chance to stay than other is high. To suit your needs who want to start reading a new book, we give you this particular Computational Intelligence in Fault Diagnosis (Advanced Information and Knowledge Processing) book as nice and daily reading guide. Why, because this book is more than just a book.

Angela Powers:

Information is provisions for people to get better life, information these days can get by anyone at everywhere. The information can be a information or any news even restricted. What people must be consider when those information which is from the former life are challenging to be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you receive the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Computational Intelligence in Fault Diagnosis (Advanced Information and Knowledge Processing) as your daily resource information.

Cassandra Giron:

Hey guys, do you desires to finds a new book to study? May be the book with the concept Computational Intelligence in Fault Diagnosis (Advanced Information and Knowledge Processing) suitable to you? Often the book was written by well known writer in this era. The actual book untitled Computational Intelligence in Fault Diagnosis (Advanced Information and Knowledge Processing)is the main of several books this everyone read now. That book was inspired many people in the world. When you read this guide you will enter the new dimension that you ever know previous to. The author explained their idea in the simple way, thus all of people can easily to be aware of the core of this e-book. This book will give you a lots of information about this world now. In order to see the represented of the world on this book.

Irene Robertson:

Playing with family in the park, coming to see the coastal world or hanging out with pals is thing that usually you have done when you have spare time, in that case why you don't try factor that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Computational Intelligence in Fault Diagnosis (Advanced Information and Knowledge Processing), it is possible to enjoy both. It is great combination right, you still would like to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't understand it, oh come on its identified as reading friends.
