Plant Centromere Biology

Plant Centromere Biology

Plant Centromere Biology is dedicated to plant centromere research. Chapters cover the structure of centromeres from several plant species including *Arabidopsis thaliana*, rice, maize, wheat and beet, while other sections cover several unique characteristics associated with plant centromeres, including classical and modern neocentromeres, centromere drive and centromere misdivision. Additional chapters are dedicated to epigenetic modification and evolution of plant centromeres, and development and application of plant artificial chromosomes.

Written by an international group of experts in the field, *Plant Centromere Biology* is a valuable handbook for all plant scientists working on plant genome research. Beyond the bench, it can also serve as a helpful reference tool or textbook for upper level college classes on cytogenetics or genome analysis.
