Chemistry & Physics of Carbon: Volume 30: v. 30 (Chemistry and Physics of Carbon)

Chemistry & Physics of Carbon: Volume 30: v. 30 (Chemistry and Physics of Carbon)

Written by distinguished researchers in carbon, the long-running *Chemistry and Physics of Carbon* series provides a comprehensive and critical overview of carbon in terms of molecular structure, intermolecular relationships, bulk and surface properties, and their behavior in an amazing variety of current and emerging applications, ranging from nanotechnology to environmental remediation. **Volume 30** not only retains the high-quality content and reputation of previous volumes, but also complements them with reliable and timely coverage of the latest advances in the field.

The first chapters analyze progressive approaches to controlling more precisely the structure, morphology, and surface properties of novel activated carbons. They cover methods using activating agents such as alkaline hydroxides as well as endo- and exotemplates made from zeolites, silica, and colloidal crystals. The third chapter examines techniques for characterizing carbon surface chemistry, including electrochemical, spectroscopic, and chromatographic methods. The fourth and final chapter compares the virtues of exfoliated graphite, carbonized fir fibers, carbon fiber felt, and charcoals in solving oil spill problems, a matter of increasing environmental concern.

Emphasizing key experimental results, practical aspects, and cutting-edge applications in every chapter, **Volume 30** is a vital resource for those developing new technologies such as drug delivery, adsorbents for oil/chemical spills, materials processing, high-performance nanocarbons, and energy storage and conversion devices, including lithium ion batteries, supercapacitors, and fuel cells.

From reader reviews:

Pamela Garcia:

This book untitled Chemistry & Physics of Carbon: Volume 30: v. 30 (Chemistry and Physics of Carbon) to be one of several books that will best seller in this year, that is because when you read this e-book you can get a lot of benefit on it. You will easily to buy this specific book in the book store or you can order it through online. The publisher in this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Cell phone. So there is no reason to you personally to past this guide from your list.

Doris Rice:

Often the book Chemistry & Physics of Carbon: Volume 30: v. 30 (Chemistry and Physics of Carbon) has a lot info on it. So when you make sure to read this book you can get a lot of gain. The book was written by the very famous author. Mcdougal makes some research previous to write this book. That book very easy to read you can find the point easily after looking over this book.

Robert Heck:

Your reading sixth sense will not betray you, why because this Chemistry & Physics of Carbon: Volume 30: v. 30 (Chemistry and Physics of Carbon) e-book written by well-known writer whose to say well how to make book which might be understand by anyone who have read the book. Written in good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still doubt Chemistry & Physics of Carbon: Volume 30: v. 30 (Chemistry and Physics of Carbon) as good book not merely by the cover but also from the content. This is one publication that can break don't judge book by its deal with, so do you still needing a different sixth sense to pick this!? Oh come on your examining sixth sense already told you so why you have to listening to another sixth sense.

Richard Taylor:

As we know that book is important thing to add our information for everything. By a reserve we can know everything we want. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This publication Chemistry & Physics of Carbon: Volume 30: v. 30 (Chemistry and Physics of Carbon) was filled about science. Spend your extra time to add your knowledge about your research competence. Some people has several feel when they reading any book. If you know how big advantage of a book, you can truly feel enjoy to read a book. In the modern era like at this point, many ways to get book that you simply wanted.
