## International Association of Geodesy: Gravity, Gradiometry and Gravimetry: Symposium Proceedings

The continuation of vigorous research on gravity has led to developments in theory, measurement and global gravity models, with applications ranging from the search for the "fifth force" to a determination of sediment structure at the bottom of a deep ocean trench. The presentations in this volume provide a detailed review of these developments focused on four main themes: - Relativity, Fifth Force & Philosophy, - Gravity Measurement, - Space Techniques & Global Models, - Regional Gravity, Geodynamics and Tectonics
