Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems)

Shu-Ching Chen, R.L. Kashyap, Arif Ghafoor

Semantic Models for Multimedia Database Searching and Browsing begins with the introduction of multimedia information applications, the need for the development of the multimedia database management systems (MDBMSs), and the important issues and challenges of multimedia systems. The temporal relations, the spatial relations, the spatio-temporal relations, and several semantic models for multimedia information systems are also introduced. In addition, this book discusses recent advances in multimedia database searching and multimedia database browsing. More specifically, issues such as image/video segmentation, motion detection, object tracking, object recognition, knowledge-based event modeling, content-based retrieval, and key frame selections are presented for the first time in a single book. Two case studies consisting of two semantic models are included in the book to illustrate how to use semantic models to design multimedia information systems.

Semantic Models for Multimedia Database Searching and Browsing is an excellent reference and can be used in advanced level courses for researchers, scientists, industry professionals, software engineers, students, and general readers who are interested in the issues, challenges, and ideas underlying the current practice of multimedia presentation, multimedia database searching, and multimedia browsing in multimedia information systems.

From reader reviews:

Walter Goodwin:

Do you one among people who can't read pleasant if the sentence chained within the straightway, hold on guys this aren't like that. This Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) book is readable through you who hate the perfect word style. You will find the data here are arrange for enjoyable reading experience without leaving even decrease the knowledge that want to deliver to you. The writer of Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) content conveys objective easily to understand by many people. The printed and e-book are not different in the content but it just different by means of it. So , do you nonetheless thinking Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) is not loveable to be your top collection reading book?

Steven Ward:

The reserve untitled Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) is the e-book that recommended to you to study. You can see the quality of the book content that will be shown to you actually. The language that creator use to explained their way of doing something is easily to understand. The article writer was did a lot of analysis when write the book, therefore the information that they share to you is absolutely accurate. You also might get the e-book of Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) from the publisher to make you more enjoy free time.

Donald Chapin:

Reading a book to be new life style in this year; every people loves to go through a book. When you study a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you want to get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, and soon. The Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) offer you a new experience in examining a book.

Elton Williams:

Reading a publication make you to get more knowledge from that. You can take knowledge and information from the book. Book is prepared or printed or illustrated from each source this filled update of news. In this particular modern era like right now, many ways to get information are available for you. From media social including newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just trying to find the Semantic Models for Multimedia Database Searching and Browsing (Advances in

Database Systems) when you needed it?
