A Biologic Approach to Environmental Assessment and Epidemiology

Thomas J. Smith, David Kriebel

A Biologic Approach to Environmental Assessment and Epidemiology Thomas J. Smith, David Kriebel
In this book, Thomas J. Smith and David Kriebel assert that important advances in the quantification of environmental risks can only come through a true synthesis of the fields of environmental epidemiology and exposure assessment. They have built a common biologic model of exposure, physiologic response, and disease, a synthesis of the various existing models which serves to both simplify and improve the application of environmental epidemiology and exposure assessment to current and future environmental chemical risks.
