## **Reeds Marine Distance Tables: 59,000 distances and 500 ports around the world (Reed's Professional)**

J.E. Reynolds, R.W. Caney

Reeds Marine Distance Tables are the perfect ready-reckoner for any navigator wanting a quick and accurate distance reference between all the regularly used ports around the world. The book is divided into key 'market areas', and includes a pull-out map for area identification and chartlets for easy see-at-a-glance port reference. Traffic Separation Schemes are calculated into the tables and the distance to any port not included can easily be determined by making an approximation from the next closest port. Useful tables of major 'turning points' around the world (such as Cape Finisterre, Cape Horn and the Dover Straits), time zones and time and speed conversion tables are also included. Reeds Marine Distance Tables are an invaluable reference for ship owners, operators, brokers and navigators. Using this one reference, anyone can calculate the shortest or most economical distances between all the major ports in the world. This edition has a newly improved layout for ease of use, and additional more-frequented ports added.
