Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series)

Alexey Boreskov, Evgeniy Shikin

Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series)

Alexey Boreskov, Evgeniy Shikin

Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) Alexey Boreskov, Evgeniy Shikin

Complete Coverage of the Current Practice of Computer Graphics
Computer Graphics: From Pixels to Programmable Graphics Hardware explores all major areas of modern computer graphics, starting from basic mathematics and algorithms and concluding with OpenGL and real-time graphics. It gives students a firm foundation in today's high-performance graphics.

Up-to-Date Techniques, Algorithms, and API
The book includes mathematical background on vectors and matrices as well as quaternions, splines, curves, and surfaces. It presents geometrical algorithms in 2D and 3D for spatial data structures using large data sets. Although the book is mainly based on OpenGL 3.3, it also covers tessellation in OpenGL 4.0, contains an overview of OpenGL ES 2.0, and discusses the new WebGL, which allows students to use OpenGL with shaders directly in their browser. In addition, the authors describe a variety of special effects, including procedural modeling and texturing, fractals, and non-photorealistic rendering. They also explain the fundamentals of the dominant language (OpenCL) and platform (CUDA) of GPGPUs.

Web Resource
On the book's CRC Press web page, students can download many ready-to-use examples of C++ code demonstrating various effects. C++ wrappers for basic OpenGL entities, such as textures and programs, are also provided.

In-Depth Guidance on a Programmable Graphics Pipeline
Requiring only basic knowledge of analytic geometry, linear algebra, and C++, this text guides students through the OpenGL pipeline. Using one consistent example, it leads them step by step from simple rendering to animation to lighting and bumpmapping.

From reader reviews:

Dewayne Campbell:

In this age globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The book that recommended for your requirements is Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) this e-book consist a lot of the information from the condition of this world now. That book was represented how does the world has grown up. The terminology styles that writer require to explain it is easy to understand. Often the writer made some investigation when he makes this book. This is why this book appropriate all of you.

Shawn Young:

Many people spending their moment by playing outside along with friends, fun activity having family or just watching TV the entire day. You can have new activity to enjoy your whole day by looking at a book. Ugh, do you think reading a book can definitely hard because you have to accept the book everywhere? It okay you can have the e-book, taking everywhere you want in your Mobile phone. Like Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) which is having the e-book version. So , try out this book? Let's find.

Richard Strohm:

As we know that book is significant thing to add our expertise for everything. By a reserve we can know everything we want. A book is a range of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This guide Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) was filled concerning science. Spend your free time to add your knowledge about your research competence. Some people has distinct feel when they reading a new book. If you know how big benefit from a book, you can sense enjoy to read a reserve. In the modern era like at this point, many ways to get book that you just wanted.

Hilary Winters:

A lot of people said that they feel weary when they reading a guide. They are directly felt that when they get a half areas of the book. You can choose typically the book Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) to make your current reading is interesting. Your current skill of reading talent is developing when you including reading. Try to choose basic book to make you enjoy to study it and mingle

the sensation about book and studying especially. It is to be very first opinion for you to like to start a book and examine it. Beside that the publication Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) can to be your friend when you're really feel alone and confuse with what must you're doing of this time.
